## **USE ONLY FOR FILING A PROVISIONAL APPLICATION FOR PATENT**

This collection of information is required by 37 CFR 1.51. The information is used by the public to file (and by the PTO to process) a provisional application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 8 hours to complete, including gathering, preparing, and submitting the complete provisional application to the PTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, Washington, D.C. 20231. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Box Provisional Application, Assistant Commissioner for Patents, Washington, D.C. 20231.

Re: Filing Provisional Patent Application

Dear Sir:

Enclosed for filing please find a provisional patent application entitled:

DUAL TEMPERATURE PIZZA OVEN

by Donald Forkner

The undersigned hereby certifies that this document is being deposited with the United States Postal Service today, November 25, 2003, by the "Express Mail" service, utilizing Express Mail label number ER 379230791 US, addressed to: Mail Stop Provisional Patent Application, Commissioner for Patents, P O Box 1450, Arlington, VA 22313-1450.

Please indicate receipt of this application by returning the attached postcard with the official Patent and Trademark Office receipt ~~attached to the postcard~~ thereon.

Respectfully submitted,

Enclosures

## DUAL TEMPERATURE PIZZA OVEN

[0001] The present patent application is directed to a pizza oven specifically intended to bake frozen pizzas of two different types. Frozen pizzas are commonly sold in today's marketplace are of two different types. One type is a pizza in which the dough is intended to rise during the baking process. The other type of pizza has a pre-baked crust and merely requires that the pizza be heated and the cheese melted in order for the pizza to be considered done. The pizza oven as described here is intended to be the simplest possible appliance which still is capable of baking both styles of pizza with the simplest possible interface for the user.

[0002] Shown in Fig. 1 is the pizza oven. It has a display for time left to cook and it has only five buttons on the front of it. One button is simply a power button, on or off. Two of the buttons are for setting the cooking interval, one button being up and one button being down. The other two buttons are alternately for high temperature and low temperature, and these two buttons are linked so that only one setting can be active at a time.

[0003] In its operation, the oven performs two different processes depending on which of the two buttons is pressed. If the low temperature button is pressed, the oven will cook at around 350°F in the normal time periods presented to the user will be between twenty and thirty minutes, a time period which can be varied by the user. If the user presses high temperature, the oven cooks at around 450°F and the time range is twelve to fifteen minutes.

[0004] In this way the oven has a pre-set set of conditions for self-rising pizzas and a pre-set set of conditions for pre-baked pizzas all in the same oven with minimal interfaces or effort required by the user.

[0005] Wherefore the application seeks to claim a pizza oven having controls on the front, one of the controls being for high or low temperature and the other being for controlling the time of cooking.
